Response to Amendment

1. The amendment filed on December 24, 2003 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-7 and 9-10 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 1, 3, 5, 6, 7, 9, and 10, respectively of U.S. Patent No. 6,534,772. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter in the 6,532,722 patent claims a nearly identical high-resolution phosphor screen as the one claimed in this application.

In claim 1 of Patent 6,534,772, the reference discloses the use of a phosphor, whose scope includes storage phosphors.

4. Claim 8 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,534,772 in view of LeBlans et al. (US Patent 6,045,722).

The limitations set forth in claim 1 have been claimed by Chhabra et al. (US Patent 6,534,772), however the reference does not state the specific type of phosphor, BaFBr:Eu+2. However, it is well known in the art that this type of phosphor can be used in various applications, such as a high-resolution radiation imaging storage phosphor screen. LeBlans et al. discloses that the phosphor material used in imaging can be made of BaFBr:Eu+2 (see column 2, lines 30-36). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the BaFBr:Eu+2 phosphor with the invention as disclosed by Chhabra et al., as it would only involve a matter of design choice as to which type of phosphor will be used in the invention as claimed by Chhabra et al.

Response to Arguments

5. As stated above, the reference discloses the use of phosphors, but does not specify the use of storage phosphors. However, storage phosphors are within the scope of phosphors and would therefore be included as a possible material for use with the invention as disclosed by the reference.

6. In response to applicant's argument that the functionality of the storage phosphors differs from the phosphors disclosed in the reference, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Allowable Subject Matter

7. Claims 11-16 are allowed.
8. The following is a statement of reasons for the indication of allowable subject matter:
The statement of reasons for indicating allowable subject matter was disclosed in the previous office action.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
